

/invitations

Returns a list of members invited to this target.

An invitation list is a set of members selected to participate in a specific target based on criteria such as their participation in a previous survey. Only members in the invitation list will be considered for participation in the specific target.

An invitation is not a guaranteed qualification. There may be additional screening criteria and quotas that must be met by the member.

Invitations lists may be represented in one of two ways.

1. **Direct:** A direct list is a discrete list of specific member ids.
2. **Indirect:** An indirect list is a list of other target ids and related survey statuses. Only members who have participated in one of the specified targets and have resulted in one of the listed outcomes will be considered to be invited.

At this time, there is not an endpoint that will allow you to pull a list of member ids associated to an indirect invitation list. But, you may choose to track participation and outcomes on your side so that you may determine this on your own.
