

Welcome!

Critical Mix offers a variety of public API endpoints for automation with our clients, suppliers, and partners. Below is a list of our current API offerings

CMIX Survey Platform API

The [CMIX Survey Platform](#) offers you a collaborative survey programming environment, access to global target audiences, and in-depth data visualizations, reporting, and insights. Best of all, we have a fully integrated API solution to meet all your needs!

Supplier API

Critical Mix's Supplier API is designed to give you access to all the resources needed to automate and optimize your supply against our available survey inventory. We are continually adding new endpoints as we identify additional needs or features that could benefit both Critical Mix and our suppliers. [Contact us](#) to get started with the Supplier API today!

Client API

Our Client API provides endpoints that aid in the automation and securing of data exchanged between Critical Mix and our clients. We plan to continually add new endpoints as we identify additional needs or features that could benefit both Critical Mix and our clients. [Contact us](#) to get started with the Client API today!
